SUMMARY

Flutter Developer with 3+ years of experience in mobile application development.

Proficient in requirement analysis, design, implementation, maintenance, and troubleshooting.

Hands-on experience with industry-standard technologies, including Visual Studio.

Involved in all phases of the project life cycle, from requirements gathering and client interaction to task management, QA support, and server deployments.

Worked on database projects utilizing Visual Studio and other Microsoft technologies.

Strong expertise in Flutter (Dart) with a solid understanding of cross-platform development.

Excellent verbal and written communication skills, with a proven ability to collaborate and coordinate effectively within teams.

EXPERIENCE

Sr Flutter Developer

Value & Growth Advisory

March 2026 - Present

- Developed and delivered **13+ production-ready Flutter applications** for Android and iOS.
- Built scalable applications using **Flutter, Dart, BLoC/Cubit, Clean Architecture, and REST APIs**.
- Integrated **Firebase, Supabase, Stripe, Apple Pay, Google Pay, In-App Purchases, subscriptions, Agora, and My Fatoorah**.
- Developed advanced features including **AI functionality, video consultations, payment systems, course platforms, quizzes, and real-time communication**.
- **Managed multiple projects end-to-end**, including requirements, task planning, development, team coordination, testing, client communication, and delivery.
- Led collaboration with **UI/UX designers, backend developers, QA engineers, and stakeholders** while managing releases and production deployments.
- Leveraged **Agentic AI, AI-assisted development, and prompt engineering** to accelerate coding, debugging, refactoring, documentation, and feature implementation.

Flutter Developer

RenesisTech

July 2023 - March 2026, Lahore, Pakistan

- Developed and maintained **cross-platform Flutter applications** across AI, healthcare, e-commerce, AI story & image creation, and service-based domains.
- Built **4+ AI-powered applications**, integrating LLMs and AI services including OpenAI.
- Implemented **BLoC, Provider, Riverpod, Clean Architecture, REST APIs, Firebase, Supabase, and third-party SDKs**.
- Integrated **payments, subscriptions, in-app purchases, Agora video/audio calling, AI transcription, authentication, notifications, and local databases**.
- **Managed projects and coordinated development** with designers, backend developers, QA teams, and stakeholders, including **client meetings, requirements gathering, progress updates, and timely delivery**.
- Optimized application performance, resolved complex bugs, and contributed to **Agile/Scrum, Git, GitHub, GitLab, and CI/CD workflows**.

PROJECT

Cube - Online Learning & Education Platform

VGA

- Developed a Flutter-based e-learning platform where students can browse and purchase courses, watch video lectures, and access course playlists.
- Implemented interactive quizzes and assessments with structured course content and learning workflows.
- Integrated REST APIs, Bloc state management, video content, course/purchase management, and responsive reusable UI components.
- Contributed to testing, performance optimization, bug fixing, and feature enhancements.

Cozy Space - Design Marketplace & Project Management App

VGA · play.google.com/store/apps/details?id=com.vga.cozyspace&pcampaignid=web_share

- Developed a Flutter-based two-sided marketplace connecting clients with professional designers for interior, garden, architecture, and branding projects.
- Implemented design requests, proposals, real-time chat, project milestones, deliverables, 3D previews, reviews, and shopping workflows.
- Integrated REST APIs, Bloc state management, file/photo uploads, notifications, secure payments, and English/Arabic RTL localization.
- Built responsive UI and reusable components while contributing to testing, performance optimization, bug fixing, and Google Play Store deployment.

Azemti – Event Venue Booking & Marketplace App

VGA · play.google.com/store/apps/details?id=com.vga.azemti&pcampaignid=web_share

- Developed a Flutter-based event venue discovery and booking platform for the Kuwait market.
- Implemented venue search, categories, real-time availability, booking, favorites, reviews, notifications, and secure payments.
- Integrated REST APIs, Bloc state management, real-time chat, and English/Arabic localization.
- Contributed to responsive UI development, API integration, testing, optimization, bug fixing, and Google Play Store deployment.

Modelus – E-Commerce Shopping App

VGA · apps.apple.com/pk/app/modelus/id6749026418

- Developed a cross-platform Flutter e-commerce application specializing in girls' school clothing.
- Implemented product browsing, product details, shopping cart, checkout, and order management workflows.
- Integrated REST APIs for products, user accounts, addresses, and order processing.
- Implemented secure address and payment management to support a smooth checkout experience.
- Built responsive and reusable UI components with Bloc state management for scalable application architecture.
- Implemented form validation, API error handling, loading states, and optimized navigation and user experience.
- Contributed to bug fixing, feature enhancements, testing, performance optimization, and App Store deployment.

Biky

VGA

- Developed the complete **Flutter mobile application** for bike buying, selling, and renting.
- Implemented **bike listings, search, filters, categories, and detailed bike profiles**.
- Integrated **REST APIs** for users, bikes, listings, rentals, and transactions.
- Built **rental booking and availability** functionality.
- Implemented **authentication, notifications, and user profile management**.
- Collaborated with the **backend, design, and QA teams** to deliver and maintain the application.

We Care

VGA · apps.apple.com/pk/app/wecare-%D9%88%D9%8A-%D9%83%D9%8A%D8%B1/id6761058124

- Developed a cross-platform Flutter service marketplace connecting customers with professionals for on-demand service booking.
- Built responsive and user-friendly service discovery, provider profiles, and booking workflows.
- Integrated REST APIs for authentication, service management, user profiles, and booking operations.
- Implemented scalable Flutter architecture with Bloc state management and reusable UI components.
- Developed dynamic screens for service categories, service details, bookings, and user interactions.
- Handled API states, validation, loading/error scenarios, and smooth navigation across the application.
- Optimized application performance and UI responsiveness for iOS and Android.
- Contributed to bug fixing, enhancements, testing, and App Store deployment.

MyDesiary

Renesis Tech · apps.apple.com/pk/app/mydesiary/id6758665232 **MyDesiary**

- Engineered robust UI components and integrated diverse APIs to enhance application functionality, elevating user experience and enabling seamless connectivity across platforms.
- Engineered scalable platform architecture for MyDesiary, integrating advanced features and optimizing backend workflows to support seamless user journeys and efficient operations.

Mediverse

Renesis Tech · apps.apple.com/pk/app/mediverse-health/id6753073047 **Mediverse Health**

- Independently developed and published a cross-platform health management app using Flutter and Dart.
- Integrated Restful APIs.
- Integrated Stripe API and insurance card validation for secure online payments.
- Implemented video consultation features with real-time audio/video calling and scheduling.
- Designed intuitive UI/UX, managed state efficiently, and handled Firebase authentication and notifications.
- Deployed the app on Google Play Store and App Store.

Doc Management

Renesis Tech

- Document Management like scanning, , creating PDF etc.

Stylala

Renesis Tech

- Designed a clean and intuitive user interface for the project
- Integrated AI-powered and other APIs to enhance features
- Worked closely with backend developers to ensure smooth API connectivity and performance optimization

KyooPay

Renesis Tech

- Developed and integrated maps for location-based services within the e-commerce app.
- Designed and built the entire project UI, ensuring a user-friendly and intuitive experience.
- Integrated various APIs, including AI-based APIs, for enhanced functionality and features.
- Collaborated with the backend team to streamline API connections and optimize performance.

StoryMii

Renesis Tech • apps.apple.com/pk/app/story-mii/id6476496606 Story Mii

- Built intuitive and responsive user interfaces using Flutter for mobile applications.
- Integrated AI-based APIs to enhance app functionalities and user experience.
- Worked extensively on API integration for seamless data flow and interaction between front-end and back-end systems.
- Developed custom UI components tailored to project-specific requirements.
- Ensured smooth API communication, including handling errors and optimizing data transactions.
- Implemented AI features through API integrations, contributing to intelligent and dynamic app behaviors.

EvalPro

Renesis Tech • apps.apple.com/pk/app/evalpro-ai/id6469349191 EvalPro.ai

- Designed and developed project UIs using Flutter to ensure responsive and user-friendly interfaces.
- Integrated APIs to connect backend services and manage data flow within applications.
- Implemented AI API integration for a chatbot, enhancing interactive user experiences.
- Ensured smooth functionality through seamless API integrations with external services.

EDUCATION

Bachelors of Science in Information Technology

Superior University Lahore • Lahore • 2023

CERTIFICATIONS

Flutter Development

PNY • 2022

- I have completed a certification in Flutter development, where I learned the basics of building cross-platform mobile applications. This included gaining foundational knowledge in Dart programming, widget structure, app navigation, responsive UI development, and integrating third-party libraries.

SKILLS

Skills: Flutter Application Development
Cross-Platform Mobile Development (Android & iOS)
AI-Powered Mobile Applications & LLM Integrations
RESTful API & Third-Party SDK Integration
State Management (BLoC, Provider, Riverpod)
Firebase & Supabase Development
Firebase Cloud Functions & Serverless Integrations
Authentication & Authorization Systems
In-App Purchases & Subscription Management
Payment Gateway Integration
Real-Time Communication (Agora Audio/Video Calling)
Push Notifications & Background Services
Real-Time Database & Live Data Synchronization
Responsive UI/UX Development
Performance Optimization & Application Scalability
Local Storage & Database Management
Testing, Debugging & Error Resolution
Git Version Control & Collaborative Development
CI/CD & Release Management
App Store & Play Store Deployment
Clean Architecture & Scalable Code Structure
Agile Development & Team Collaboration
